

# Connecting the new Blackberry Bold to the TAMULink Network

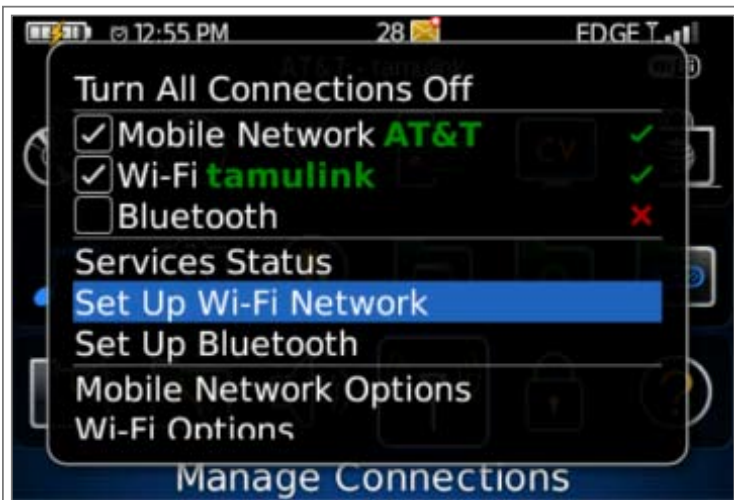

## 1) Open Manage Connections

## 2) Turn on the Wi-Fi.

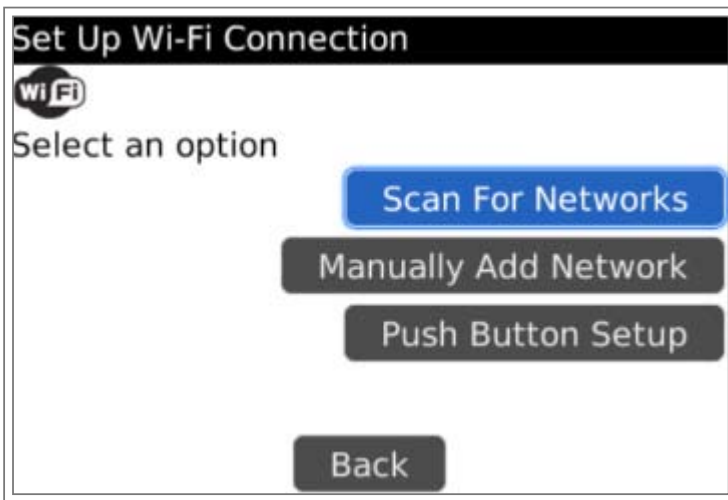

## 3) Open Set Up Wi-Fi Network

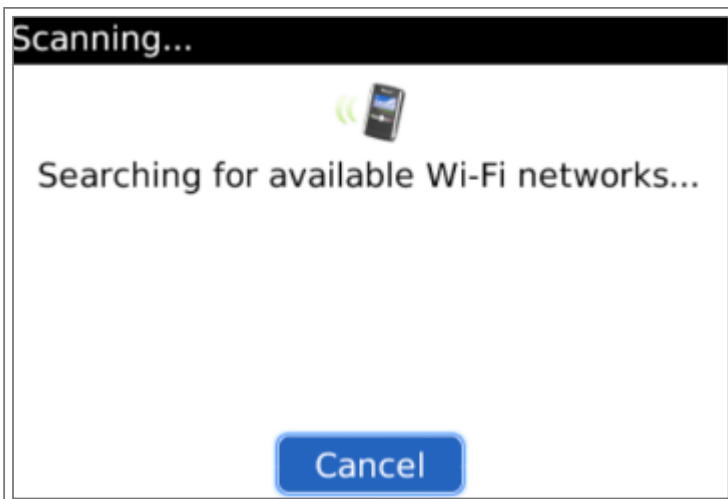

4) Click Next past the Welcome screen.

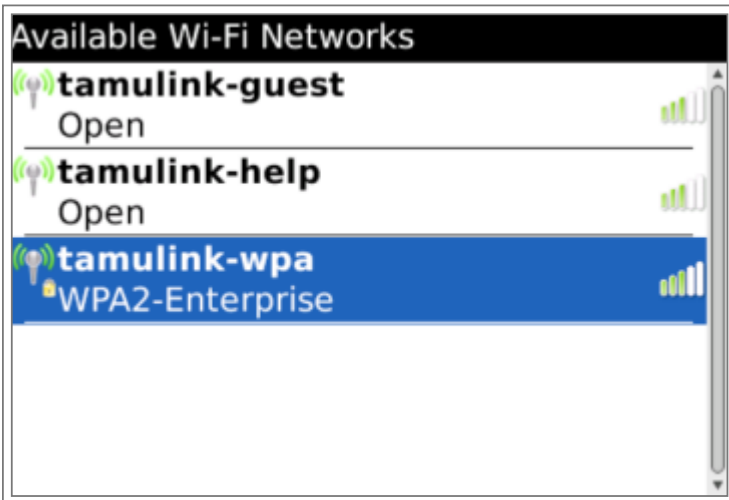

5) Click on Scan for Networks

6) Wait while it finds the TAMULink wireless network.

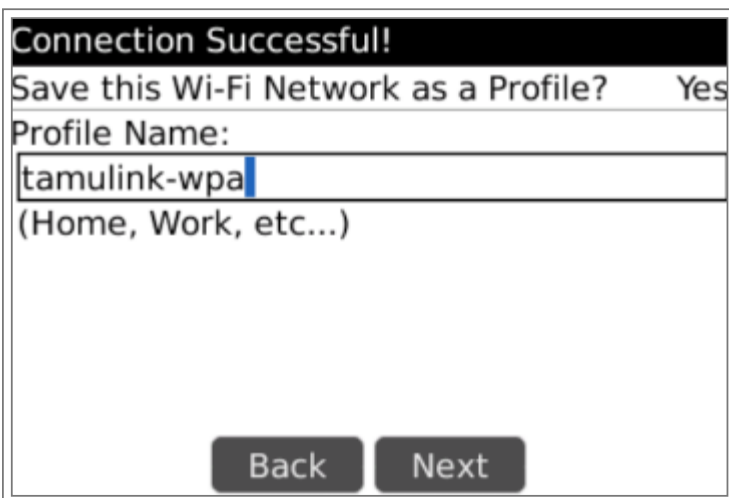

7) Once the Available Wi-Fi Networks appear, click on tamulink-wpa.

8) The BlackBerry will automatically choose the appropriate security type (PEAP). You will only need to fill in your NetID username and password. In the CA certificate field, choose "Go Daddy Valicert Class2 Root". Now click Connect.

9) Once connected you will have the option of saving this to your wireless profiles.

10) Once you return to your home screen you will see AT&T - [profile name] at the top showing that you are connected.

For any additional assistance connecting your Blackberry to Tamulink, please call Help Desk Central any time at 979.845.8300, visit us on the web at [hdc.tamu.edu](http://hdc.tamu.edu) or you can email us at [helpdesk@tamu.edu](mailto:helpdesk@tamu.edu).
